**CONNECTED
SHADES**

somfy Building
happiness

hi :)

In today's smart world, everything is connected. Modern-day technology has penetrated our lives, and it's here to stay. Think about it. We have smart TVs, virtual reality headsets, smart cars – the list goes on. We have become completely reliant on technology, smart appliances, and devices, in every aspect of our lives.

But...take a step back and think. What's missing? We'll tell you what...

... CONNECTED SHADES!

Let **Somfy** complete your circle of (smart) life by getting your blinds connected. **Smart blinds ensure comfort, convenience, safety, and privacy, simplifying life at home with full control from your smartphone.**

SET A NATURAL TIMER AND WAKE UP WITH THE SUN – DAY AFTER DAY

Nothing beats natural sunlight - waking up to natural sunlight is a powerful way to start your day with the perfect state of mind, while ensuring high energy levels all day long.

Who needs the stress of an alarm clock, when you've got connected shades?

How does it work? 

Program your shades to open at your desired hour and minute daily

 **07:00** 

M T W T F S S

Styling tips

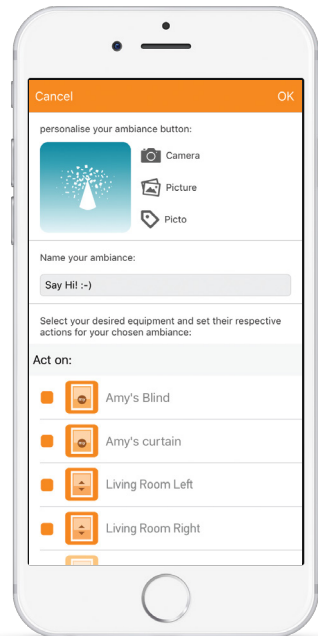

Use curtains and blinds cleverly together to create the stylish window - with texture, and functionality. To enhance the drama of the heavy velvet on the outside, choose a light roller blind in a translucent fabric to allow diffused light into the room.

REPLAY YOUR FAVOURITE AMBIENCE FOR YOUR SPECIAL MOMENTS

It's easy, really.

Just open your blinds using your phone, and strike a pose. #SayHi.

One tap turns your room into your favourite lighting setup. Or even easier, just use your voice!

Say
hi :) to
your
#MoodOfTheDay

How does it work?

1. **Preset your shade position** to shape the perfect mood and atmosphere
2. Pick from **eight scenarios** and transform your #MoodOfTheDay
3. Positions. Names. Icons. Pictures. **Every preference is yours** to manipulate.

Smart tips

In just one tap, control even the most hard-to-reach windows including deep window sills, high ceilings, and even behind large furniture! #MOTD #PlayingWithLight #Selfies #OneTouch #VoiceControl

TECHNOLOGY THAT WORKS FOR YOUR FAMILY

My family means the world to me.

Technology allows me to check on my loved ones remotely. When I caught a glimpse of harsh sunlight disrupting Amy's sweet slumber through the IP camera, I could provide with her with shade by adjusting the venetian blinds from my phone - **even when I'm away from home.**

How does it work?

All you need is an internet connection

Say
hi :) to
your home
from afar

Smart tip Use venetian blinds to control how much light you let into a room by the angle of the slats.

Say
hi :) to
Convenience

TAKE CONTROL WITH YOUR SMARTPHONE – CONVENIENCE AT YOUR FINGERTIP

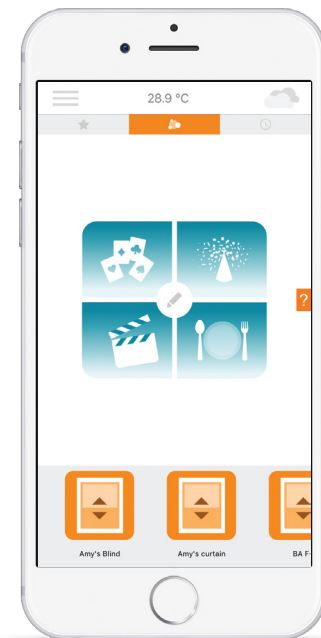

You've found the most comfortable position in your sofa while watching your favourite TV program when the glare hits your screen. You don't want to move an inch, how about you change your entire situation from the palm of your hand.

Now – THAT'S what we call convenience!

How does it work?

1. Pick up your phone
2. Open the app
3. Tap
4. Voila! The glare is gone, and you can get back to your show.

Bring convenience to the next level -
How does it work?
just say it, and voila!!

Fun Facts

Studies show that 82% of mobile phone users always keep their device within arm's reach. Use it to your advantage, and be like 70% of Somfy app users in France who use the app day...after day...after day.

Say
hi :) to
your private
cocoon

PRESERVE YOUR PRIVACY

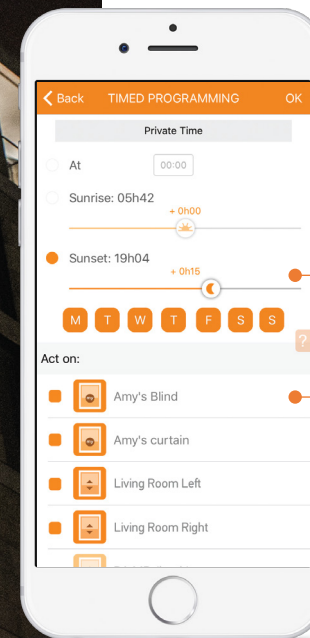

For sure you wouldn't prefer your lovely family time in your living room clearly viewed by the opposite neighbor eight feet away, peering through the glass they could even read the titles of the book on your shelves –
Let your connected shades take care of you!

How does it work?

Turn on the Sunset Timer

Schedule your blinds to close automatically at sunset, which happens at different times each day, to preserve your privacy giving you peace of mind.

Drag it to be more precise by minutes

Close the shades in all room

Security tips

Closing your blinds at night prevent burglaries by not shining a spotlight on everything you own.
Don't forget to turn on the GPS location feature.

TAP INTO UNLIMITED POSSIBILITIES... WITH CONNEXOON

Control shades position, set timers, create routines, align the shades precisely, change slat angle and so much more...

 Wake up gently to the sunrise

 Set schedule for guaranteed privacy

 Control your shades from anywhere, anytime

 Use "Ambience" to align your shades with your mood

 Adds the extra special element to your overall interior design

EVEN SMARTER - CONTROL YOUR SHADES CONVENIENTLY BY VOICE!

IFTTT

Thanks to IFTTT, you can ask Alexa or Google Assistant to launch your Connexoon ambiances.

Product Features

-  Customise up to 8 scenarios per user
-  Manage up to 8 timers for 7 days a week
-  Identify up to 30 channels, for as many Somfy connected shades in your home as you want.
-  Control a wide variety of window applications: roller blinds, curtains, venetian blinds, roman shades, cellular and zebra blinds
-  Can control Philips Hue as well!

Easy steps to set up Connexoon

DIY friendly without the need for a technician.

[1] Activate Connexoon online <www.somfy-connect.com>

[2] Unbox and plug it in. Simple.

[3] Download the Connexoon app.

[4] Follow our step-by-step wizard to link your shades with your app.
